## **Solar Energy- Solar Street Lights**

### **Use and Impact**

- Solar energy is environmentally friendly.
- Solar energy is cost effective.
- Solar energy is unlimited source.
- Solar lighting systems require a very little maintenance.
- Solar lighting save the energy conventional energy and its Bills.

Hon. Shri Annasaheb Dange ACS College, Hatkanangale. Dist. Kolhapur (MS)

## Sensor Based Energy Conservation

### Use and Impact

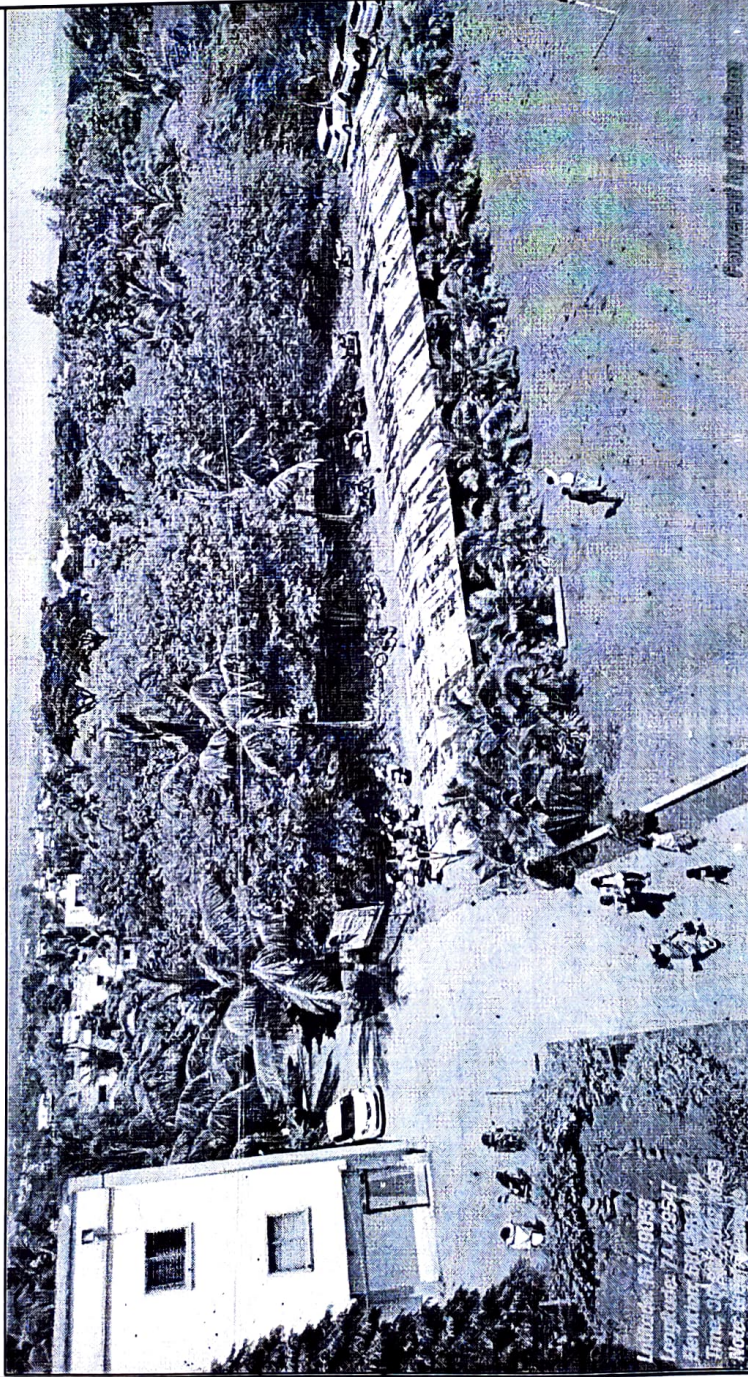

- It consumes very low power.
- It saves electricity. When person forgets to turn off the switch, light bulb automatically gets OFF after few seconds (~20) of idle condition.
- It operates with wider voltage range from 120V to 320V.
- It works with low light ambience conditions.

## Hon. Shri Annasaheb Dange ACS College, Hatkanangale, Dist. Kolhapur (MS)

### Green Campus

### Use and Impact

- Health & Well-Being of Occupants.
- Enhancing Air Quality & Promoting Biodiversity.
- Conservation of National Resources.
- Reduce Environmental Pollution.
- Reduce Energy Costs.
- Conserve Natural Resources.
- Raise Self Aware Children.
- Impact Change In Your Community.
